

New Zealand's favourite office chair

NOW CERTIFIED NET CARBONZERO

SPECTRUM

Spectrum is Eden's original ergonomic task chair range. Now over 30 years in the market and supported with a 15-year warranty, it's designed to last and designed to be sustainable.

SPECTRUM HAS A SUPER-LIGHT CARBON FOOTPRINT AND WE'RE COMMITTED TO ENSURING IT GIVES MORE THAN IT TAKES FROM OUR PLANET.

Spectrum chairs are designed to be easily refurbished and repaired, and to be recycled at the end of their lifetime.

We believe Spectrum is the most environmentally-positive new chair purchase you can make – yet another reason for it to be New Zealand's favourite office chair!

TOITŪ

ISO 14067
PRODUCT

Toitū Envirocare's net carbonzero certification requires that the Spectrum chair's lifecycle carbon emissions are measured and in line with international standard ISO 14067; that emissions intensity is managed and reduced in accordance with Toitū requirements; and that remaining cradle-to-grave emissions are compensated for following Toitū requirements.

Why is Spectrum a favourite?

When Eden introduced Spectrum in the early 1990s, its powerful lumbar support contour and distinctive shaped seat quickly made it very popular with computer-users and widely recommended by health professionals.

Spectrum's **uniquely contoured backrest** is constructed of complex foam layering, and is designed to provide optimum lower back support, and encourage positive posture.

It's been said, you can't slouch in a Spectrum.

The **ergonomically contoured seat base**, with high-resilience moulded seat foam, provides an initial soft feel sit, and continues to support you as you work.

The highly crafted upholstery and the full range of ergonomic adjustments mean Spectrum can provide true all-day seated comfort.

THE 3-LEVER MECHANISM - FOR PERSONALISED COMFORT

Spectrum 3 chairs feature a heavy-duty 3-lever mechanism – always a first choice recommendation for any computer-user. The independent adjustments allow you to set the seat and backrest precisely to suit yourself.

GASLIFT SEAT HEIGHT ADJUSTMENT

The seat height is adjusted by the front right lever. The standard gaslift has a generous 130mm adjustment range and other gaslift options are available.

BACKREST ANGLE ADJUSTMENT

The backrest angle is adjusted by the back right lever. The backrest adjustment offers a wide tilt range so you can choose a position to suit.

SEAT ANGLE ADJUSTMENT

The seat angle is adjusted by the lever at the back of the seat on the left. You can adjust the angle of your seat to suit your preference.

BACKREST HEIGHT ADJUSTMENT

The backrest height is adjusted by the knob at the back left of the mechanism. It allows you to position the lumbar support exactly to fit the curve of your lower back.

SPECTRUM OPTIONS

Along with the distinctive lumbar support and seat shaping, what makes Spectrum so unique and user-friendly is the extensive range of seat size options and upgrade features

The range of seat options allows users of all builds to experience the same exceptional comfort and support.

Pictured are some of our most popular options. Others can be viewed on our website.

LONG/WIDE SEAT OPTION

The Long/Wide Seat is our most popular upgrade option. Its supportive contouring is enjoyed by users of both average and larger build.

Long/Wide Seat: 520w x 520d

WIDE SEAT OPTION

The Wide Seat option provides generous support for users who are a larger build, but of a less than average height.

Wide Seat: 520w x 480d

LONG SEAT OPTION

The Long Seat option is a popular choice for tall slim users.

Long Seat: 470w x 520d

500 SEAT OPTION

The 500 Seat is a generous deluxe-padded seat that will suit the majority of users.

500 Seat: 510w x 490d

Spectrum standard dimensions

HEIGHT ADJUSTABLE ARMS OPTION

Height Adjustable Armrests provide a soft-feel support for your forearm and are adjustable from 190mm to 260mm above the seat.

INFLATABLE LUMBAR SUPPORT

The Inflatable Lumbar Support is designed to support users with lower back pain. Its firm support can be varied to suit.

HIGHLIFT OPTION

The HighLift option is designed for any high worksurface situation, including laboratories and teller desks. The footrest is height adjustable. We recommend this option is chosen with our Spectrum 2 chair, with its fixed angle seat.

SPECTRUM 200

Spectrum 200 features strengthened components and is designed to support users up to 200kg. It features a 2-lever mechanism with back height and back angle adjustments, and fixed seat angle.

Seat dimensions: 520w x 520d

SPECTRUM CHAIRS ARE AVAILABLE FOR A ONE WEEK TRIAL. CONTACT US TO DISCUSS TRIAL OPTIONS.

Eden Office are committed to the promotion of environmental sustainability.

Spectrum is covered by a 15-year warranty.

All Spectrum chair parts and components are able to be easily replaced, so the life of the whole chair is extended.

15YR
15-YEAR
WARRANTY

When your Spectrum chair has reached the end of its life or you no longer need it, we can take it back and recycle or repurpose it.

We are able to recycle approx. 80% of the Spectrum chair.

Our refurbishment service offers an economical and environmentally-positive way to breathe new life into your chairs.

GreenGuard Gold

This certifies that product chemical emissions are at safe levels, in view of minimising indoor air pollution and potential chemical exposure.

FSC Chain of Custody

All timber components of Spectrum chairs are FSC® certified, made with material sourced from sustainably managed forests
